At the monthly dinner meeting of the Everglades Branch of the National League held Tuesday night in Pahokee scorching testimony was given by several members which indicted the OPA regulatory system, for the condition in which the South Florida vegetable industry finds itself today. Roy Segre, president of the League branch, cited many instances where legitimate vegetable dealers have been driven to black market operations to keep their doors open.

President Ségura among other things said: "hundreds have become rich at the expense of the growers and distributors through black market operations. Stories coming out of big markets in the north and east lead one to believe that black market operations brought about by OPA interference are even worse than the

## MECHANICAL FARMING

Agriculture's mechanical revolution, held in check by wartime production restrictions, is ready to break loose when peace comes. Many a farm job will be less of a chore, if the expectations of government experts are realized. "Stoop labor" involved in harvesting sugar beets, potatoes, peanuts and other subsurface or low-growing crops, will be banished by mechanical con-

traptions. Hay will be cured in "air conditioned" buildings, instead of under an unreliable sun.

A single machine may pluck corn from the stalk, free the ear from the husk, shell the kernels from the cob, in a continuous operation. King Cotton will ride a mechanical picker. Airplanes are expected to be more widely used to dust insecticides on plants. Horses will disappear from farms at an accelerated rate, and there is even a distant possibility that the plow, too, may disappear with the advent of controversial "mule" farming. In this kind of farming the top soil is not turned over; its surface is scratched.

A good number of proposed machines have been tried out and proved practicable. Big farm machinery manufacturers in the Midwest are making what preparations they can to swing into production as soon as materials are available.—Wall Street Journal.

## Swanky Uniforms For Navy's WAVES

High thermometer readings will hold no terror for the WAVES this summer, according to those who have had a preview peek of the new summer uniforms. While the Palm Beach white will continue to be the dress uniform, Mrs. Martin Bache, Pahokee Volunteer WAVE recruiter, stated, the new ensemble will be for day dress. The new uniform, which was designed by the fashion creator, Mainbocher, is of grey and white striped net-sucker. The dress is one piece, neatly tailored with one kick pleat in the front and three gores in the back of the skirt. The fitted jacket is also of matching material. With this outfit, black shoes and gloves will be worn and matching seafarer will top the blue-trimmed hat.

## PEACE! PROGRESS! PROSPERITY!

In his speeches...

## Judge J. Ollie EDMUNDS

drives home these points:

**PEACE** can never be preserved at home or abroad as long as racial, sectional and class strife are encouraged by ambitious and scheming men in their efforts to grab more power.

**PROGRESS** can never be made as long as this country is under the rule of bureaucrats who not only are able to take away our individual freedom but by edicts, rules and regulations control the agriculture, business and industry of the nation.

**PROSPERITY** can never be maintained as long as our taxes and the money loaned to the government by patriotic citizens to finance our country to victory is being thrown away in extravagant and wasteful expenditures by a majority of the more than 2,000 federal boards, bureaus and commissions now in existence.

**JUDGE J. OLLIE EDMUNDS** will serve Florida and the nation as our Senator by fighting to curb the power of political masters and helping to end federal waste and extravagance—and he will do it with a true dignity and diplomacy that will win him the respect and cooperation of his colleagues in the Senate.

FRIDAY NIGHT  
APRIL 14, WQAM 7:15 P. M.

### SOMETHING to think about!

There are today 3,300,000 persons on the federal payroll—some 60,000 of them in Florida.

Federal employees, especially those holding non-civil service jobs form a powerful political group which in many cases hold the balance of power in elections—a dangerous weapon in the hands of political masters seeking more power.
